1984 HEGIS SUMMARY REPORT

The data provided throughout this report are compiled from aggregate forms completed by individual Massachusetts colleges and universities as part of the Higher Education General Information Survey administered by the Board of Regents and the National Center for Educational Statistics, U.S. Department of Education. Only data pertaining to those institutions authorized to grant degrees in Massachusetts, or which have degree granting authority in association with another institution, are included in this report. Examples of the latter case include the School for the Musuem of Fine Arts which grants degrees through Tufts University, and the Forsyth School of Dental Hygienists, the students of which receive degrees from Northeastern University.

This report is presented in three sections: the first gives an overview of all Massachusetts colleges and universities, both public and independent; the second provides institutional data from the 29 public colleges and universities supported by the state and three public, non-state supported two year colleges; and the third provides institutional data from 87 of the 90 independent colleges and universities. All three sections include data on Student Enrollment (Fall 1984); Racial / Ethnic Data on Students Enrolled; Degrees Granted (July 1, 1983 through June 30, 1984); and Data on Full-Time Faculty. Each part of the report is prefaced with an explanation of the categories used to report data and is annotated where appropriate to facilitate interpretation.

An attempt is made to present the data in a form which is useful to a variety of users. The presentation of data parallels comparable information provided in previous summary reports. The Board of Regents would like to express thanks to the 119 of the 122 higher education degree granting colleges and universities which completed the HEGIS forms and whose data appears throughout this report (see Appendix 1 for listing). Three colleges chose not to participate in the survey (American Institute of Banking, Pope John XXIII National Seminary, and Woodshole Oceanographic Institute).

SECTION I

AGGREGATE PROFILE DATA

STUDENT ENROLLMENT DATA

Student enrollment data presented represent head count enrollment for the Fall of 1984. The data are displayed in various formats, separating full and part time students; undergraduates, graduates and first professionals; and classified and unclassified students. The data are systematically presented by institutional level (2 year, 4 year[1], and university) and by sector (public / independent).

Institutions reporting enrollment figures did so by sex, level (undergraduate, etc.) and status (classified / unclassified; full / part time). Unless otherwise noted, all enrollment figures include both classified and unclassified students. Classified students are those who have formally matriculated as candidates for a degree. Unclassified students are those who are taking courses for credit, but are not, according to institutional records, degree candidates at the time they are reported. The data indicate that the bulk of unclassified students are also part time.

Because of the nature of the definition of "unclassified" students, it is often difficult for an institution to accurately categorize them according to level – either undergraduate or postbaccalaureate. As a result it cannot be assumed that unclassified students are reported in the same consistent or uniform manner as the classified enrollment figures. Because the data on unclassified students are often deemed less reliable than that on classified students, data on both groups are presented separately for those who require data on students currently enrolled in degree programs.

The first figures presented in this section provide composite data on public and independent sector enrollment. The public sector data include enrollments at the twenty-nine (29) state supported colleges and universities and the three (3) non-state supported public two year colleges: Blue Hills Regional Technical Institute, Essex Agricultural and Technical Institute, and Quincy Junior College. Unless otherwise noted, enrollment figures for these three institutions are included either in public sector composite data or in the two year public college data as appropriate. It was determined after the final compilation of this report that Roxbury Community College did not report the Continuing Education component of their enrollment for the Fall of 1984. Therefore, an additional 112 full-time and 877 part-time students (479 male, 510 female) should be added to the Roxbury Community College enrollment figures.

It should also be noted that the independent sector data include enrollment at 85 of the 90 independent colleges and universities. Five colleges chose not to participate in the survey (American Institute of Banking, Eastern Nazarene College, Mt. Ida College, Pope John XXIII National Seminary, and Woodshole Oceanographic Institute). Their enrollment figures therefore are not included in this report. Their headcount enrollment is estimated to be approximately 1,900.

[1] All categories headed "four year colleges" actually include data from four year colleges and from graduate schools, as noted in Appendix I.

RACIAL / ETHNIC DATA ON STUDENTS ENROLLED

In an attempt to reduce the burden of reporting data, the HEGIS survey varies to some degree from year to year. In 1984, institutions were asked to provide a racial / ethnic breakdown of students enrolled. This information was not requested for Fall of 1983 and will not be requested for Fall of 1985.

The following section provides summary data according to the categories used to report student enrollment status. Racial / Ethnic data are presented by type of institution, sex, enrollment level (undergraduate, graduate, etc.) and status (full / part-time).

Racial / Ethnic categories used in the collection of HEGIS data include the following six (6) designations: Non-Resident Alien; Black; Non-Hispanic; American Indian or Alaskan Native; Asian or Pacific Islander; Hispanic; and White, Non-Hispanic.

It should again be noted that the independent sector data include enrollment at 85 of the 90 independent colleges and universities. Five colleges chose not to participate in the Racial / Ethnic Enrollment Data survey (American Institute of Banking, Eastern Nazarene College, Mt. Ida College, Pope John XXIII National Seminary, and Woodshole Oceanographic Institute). Their enrollment figures therefore are not included in this report. Their total headcount enrollment is estimated to be approximately 1,900.

DEGREE DATA

The HEGIS classification system identifies major fields of study by two (2) digit HEGIS codes, for the categorization of degrees awarded. Data presented in this section correspond to the HEGIS categories and generally refer to the level of degree awarded and / or to the field(s) of study. Appendix IV includes a complete listing of all HEGIS codes and classifications.

Degree data are presented in an aggregate fashion by type of institution awarding the degree. Degree data by institution are provided in the second section of this report for the public sector and in the third section of this report for the independent sector.

It should be noted that three independent colleges chose not to participate in this survey (American Institute of Banking, Pope John XXIII National Seminary, and Woodshole Oceanographic Institute). Their data, therefore, are not included in the tables which follow.

DEGREE DATA BY SEX OF RECIPIENT

Because of the numerous requests for information on the relative number of men and women receiving certain types and levels of degrees, the degree data provided in the preceding section are presented here, categorized by the sex of the degree recipient.

It should again be noted that three independent colleges chose not to participate in this survey (American Institute of Banking, Pope John XXIII National Seminary, and Woodshole Oceanographic Institute). Their data, therefore, are not included in the tables which follow.

FACULTY DATA

This section provides a profile of full time faculty employed in Massachusetts colleges and universities. Excluded from these figures are faculty employed part time or on contracts of less then nine (9) months; faculty who are members of a religious order and contribute their services; and military personnel.

The faculty data are presented both by type of employing institution (public / independent) and by level (two year, four year, university). Data are differentiated by the number and tenure rate of men and women.

It should be noted that 6 independent colleges chose not to participate in this survey (American Institute of Banking, Cambridge College of Open Education, Eastern Nazarene College, Nichols College, Pope John XXIII National Seminary and Woodshole Oceanographic Institute). Their data, therefore are- not included in the tables which follow.

1985 HEGIS SUMMARY REPORT

The data provided throughout this report are compiled from aggregate forms completed by individual Massachusetts colleges and universities as part of the Higher Education General Information Survey administered by the Board of Regents and the National Center for Educational Statistics, U.S. Department of Education. Only data pertaining to those institutions authorized to grant degrees in Massachusetts, or which have degree granting authority in association with another institution, are included in this report. Examples of the latter case include the School for the Musuem of Fine Arts which grants degrees through Tufts University, and the Forsyth School of Dental Hygienists, the students of which receive degrees from Northeastern University.

This report is presented in three sections: the first gives an overview of all Massachusetts colleges and universities, both public and independent; the second provides institutional data from the 29 public colleges and universities supported by the state and three public, non-state supported two year colleges; and the third provides institutional data from 89 of the 92 independent colleges and universities. All three sections include data on Student Enrollment (Fall 1985); Degrees Granted (July 1, 1984 through June 30, 1985); and Data on Full-Time Faculty. Each part of the report is prefaced with an explanation of the categories used to report data and is annotated where appropriate to facilitate interpretation.

An attempt is made to present the data in a form which is useful to a variety of users. The presentation of data parallels comparable information provided in previous summary reports. The Board of Regents would like to express thanks to the 121 of the 124 higher education degree granting colleges and universities which completed the HEGIS forms and whose data appears throughout this report (see Appendix I for listing). Three colleges (American Institute of Banking, Pope John XXIII National Seminary, and Woods Hole Oceanographic Institution) chose not to participate in any of the HEGIS surveys included in this report (Fall Enrollment; Degrees Conferred; Salaries & Tenure of Full-Time Faculty).

SECTION I

AGGREGATE PROFILE DATA

STUDENT ENROLLMENT DATA

Student enrollment data presented represent head count enrollment for the Fall of 1985. The data are displayed in various formats, segregating full and part time students; undergraduates, graduates and first professionals; and classified and unclassified students. The data are systematically presented by institutional level (2 year, 4 year[1], and university) and by sector (public/independent).

Institutions reporting enrollment figures did so by sex, level (undergraduate, etc.) and status (classified/unclassified; full/part time). Unless otherwise noted, all enrollment figures include both classified and unclassified students. Classified students are those who have formally matriculated as candidates for a degree. Unclassified students are those who are taking courses for credit, but are not, according to institutional records, degree candidates at the time they are reported. The data indicate that the bulk of unclassified students are also part time.

Because of the nature of the definition of "unclassified" students, it is often difficult for an institution to accurately categorize them according to level - either undergraduate or postbaccalaureate. As a result it cannot be assumed that unclassified students are reported in the same consistent or uniform manner as the classified enrollment figures. Because the data on unclassified students are often deemed less reliable than that on classified students, data on both groups are presented separately for those who require data on students currently enrolled in degree programs.

The first figures presented in this section provide composite data on public and independent sector enrollment. The public sector data include enrollments at the twenty-nine (29) state supported colleges and universities and two (2) non-state supported public two year colleges, Essex Agricultural and Technical Institute, and Quincy Junior College. Unless otherwise noted, enrollment figures for these two institutions are included either in public sector composite data or in the two year public college data as appropriate. Blue Hills Regional Technical Institute has recently consolidated with Massasoit Community College, and therefore its enrollments are included in Massasoit Community College. It should also be noted that the independent sector data include enrollment at 87 of the 92 independent colleges and universities. Five colleges chose not to participate in the HEGIS Fall Enrollment survey. Their enrollment figures therefore are not included in this report.

[1] All categories headed "four year colleges" actually include data from four year colleges and from graduate schools, as noted in Appendix I.

DEGREE DATA

The HEGIS classification system identifies major fields of study by two (2) digit HEGIS codes, for the categorization of degrees awarded. Data presented in this section correspond to the HEGIS categories and generally refer to the level of degree awarded and/or to the field(s) of study. Appendix IV includes a complete listing of all HEGIS codes and classifications.

Degree data are presented in an aggregate fashion by type of institution awarding the degree. Degree data by institution are provided in the second section of this report for the public sector and in the third section of this report for the independent sector.

It should be noted that 5 independent colleges chose not to participate in this survey. Their data, therefore, are not included in the tables which follow.

DEGREE DATA BY SEX OF RECIPIENT

Because of the numerous requests for information on the relative number of men and women receiving certain types and levels of degrees, the degree data provided in the preceding section are presented here, categorized by the sex of the degree recipient.

It should again be noted that 5 independent colleges chose not to participate in this survey. Their data, therefore, are not included in the tables which follow.

RACIAL/ETHNIC DATA OF DEGREE RECIPIENTS

In an attempt to reduce the burden of reporting data, the HEGIS survey varies to some degree from year to year. In 1985, institutions were asked to provide a racial/ethnic breakdown of students receiving degrees. This information is not requested annually.

This section provides summary data according to the categories used to report degrees conferred. Racial/ethnic data are presented by type of institution, degree program and award level.

Racial/ethnic categories used in the collection of HEGIS data include the following seven designations: Non-Resident Alien; Black, Non-Hispanic, American Indian or Alaskan Native, Asian or Pacific Islander; Hispanic; White Non-Hispanic; Unknown or Not Student Reported.

Again it should be noted that 5 independent colleges chose not to participate in this survey and therefore, their data are not included in the tables which follow.

FACULTY DATA

This section provides a profile of full time faculty employed in Massachusetts colleges and universities. Excluded from these figures are faculty employed part time or on contracts of less then nine (9) months; faculty who are members of a religious order and contribute their services; and military personnel.

The faculty data are presented both by type of employing institution (public/independent) and by level (two year, four year, university). Data are differentiated by the number and tenure rate of men and women. It is interesting that at all levels the public sector institutions have a better profile of tenured women.

It should be noted that 16 independent colleges, and one public non-state supported college chose not to participate in this survey. Their data, therefore are not included in the tables which follow.
